

A LEGACY

that will last for generations.

SINCE 1983

Conestoga Log Cabins has partnered with hundreds of Camps, Campgrounds, and Resorts all over the country. Our **ready to assemble** building kits are designed with the customer in mind.

Rugged, durable, straight forward to assemble and affordable, Conestoga Log Cabins are **engineered to last** for generations.

Each building is produced to exact specifications and precision milled in our 100,000 SQF manufacturing facility one log at a time to ensure our customers' **complete satisfaction.**

Conestoga offers a wide range of products from Cabins, Bunkhouses and Bathhouses to Commissary and Custom Buildings.

TECHNICAL SERVICES

Our field trained, service oriented Technical Support Team is experienced in all phases of the building process. We believe that communication is the cornerstone of success.

- Direct interaction with assembly teams, builders & project managers
- Site organization & construction training
- On-site technical services available
- Free phone support
- Budget savvy
- Customer focused

MAKE IT CUSTOM DESIGN & ENGINEERING SERVICES

Our staff has extensive experience in log structure design.

Building code compliance can be complex. Our engineering services will assure all building codes are met. With over 3,000 cabins in all 50 states and internationally, we can meet any code.

STRAIGHT FORWARD ASSEMBLY

Conestoga only uses low maintenance engineered logs that prevent checking, twisting and warping.

Conestoga's engineered Everlast™ Logs come in 28' length, which eliminates log joints and water and air infiltration. The Conestoga Everlast™ Log is stronger, more stable and will keep your log cabin in great shape for years to come.

The Stronger and More Stable
Engineered Log

Notice the
Tight Fit

PRECISION MILLED

to exact specifications. Each log is barcoded and referenced on the plans.

Kits are the **MOST COMPLETE** log cabin kits in the industry: predrilled electric, fasteners, brackets, doors, floors, ceilings, beams and more.
